

As an Amateur Radio Operator, PIO, Mentor/ Instructor for Emergency Communications, and a person heavily involved in Emcomm/public service work, the thought that BPL would be entertained is unconscionable. Even setting aside the adverse effects BPL would have on Amateur Radio, and Homeland Security, the number of other services that would be effected is huge. Law enforcement, Military, Fire Services, Airline passenger safety, Broadcasting, and the list goes on and on. Jobs, how many modems do you know of that are manufactured in the US? Why is the commission so interested in jobs overseas? BPL would not have helped after the 9/11 terrorist attack.....Amateur Radio DID
